

**Central European
Workshop of
Myrmecology
17-19 May 2007
Szeged, Hungary**

The 2nd Central European Workshop of Myrmecology will be held in Szeged, Hungary in the building by the Local Section of Hungarian Academy of Sciences under the organization of the University of Szeged and the HAS.

The workshop is open to all fields of myrmecology: population and community ecology, sociobiology, ethology, colony organization, colony optimization, within- and between population interactions and interactions with other organisms. We expect also papers on the taxonomy, the fauna and the biogeography of European ants.

Although the meeting is Central European as the title says, myrmecologists working in other regions are welcome, too.

Deadline for registration and abstract submission is 31 January 2007. Details of registration, fees, payment and the form of abstracts are given at our website from 30 November 2006.
